

ON-SITE SEWERAGE TREATMENT AND GREYWATER

Plumbing and Drainage Act 2018

Council approval for greywater diversion and treatment systems

You will need a council permit before installing either:

- A greywater diversion device, which diverts greywater from the bath, shower, hand basin and/or laundry to an irrigation hose.
Note: untreated greywater cannot be stored.
- A greywater treatment system, which collects the greywater and treats it to a high standard for reuse as garden irrigation.

You do not need a permit for manual bucketing or connection of a flexible hose to a washing machine outlet.
