

Let's get it sorted Burdekin

Your yellow-lid bin is for recycling
household packaging items:

steel &
aluminium cans

glass jars
& bottles

cardboard &
paper

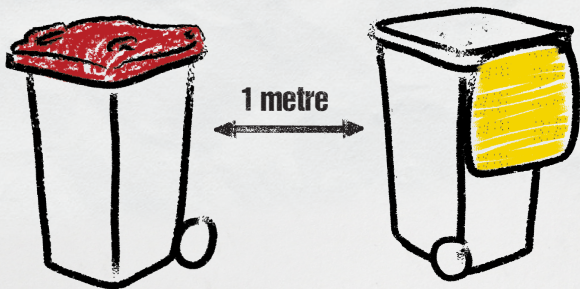

hard plastic bottles
& containers

Keep these
items loose.

My bin night is: _____

Our waste contractor works every single day of the year, so please remember to:

- ✓ Place your bins at the kerb by 6am.
- ✓ Ensure there is a metre between your bins.
- ✓ Ensure no cars, trees or letterboxes are blocking access to your bins.
- ✓ Make sure your bin is not overloaded (max weight 50kg), and your bin lid can close shut.

Contamination makes recycling more expensive and damages **our recycling facility**.

The below items should never be placed in your recycling bin and always go in your red-lid general waste bin.

Confused about recycling items? “Ask your mate!”

Search over 5000 everyday items in the local Recycle Mate sorting guide to check what can go in your yellow-lidded bin and where you can drop off items for free.

Download the app or use the local sorting guide direct from our website:

Containers for Change

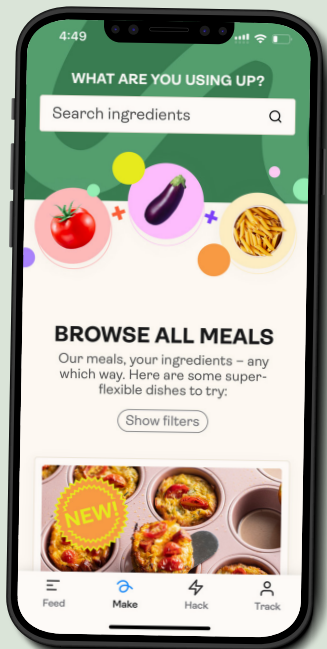

Remember, you can collect your eligible juice poppers, cans, beer, wine and spirit bottles, and drop them to your nearest Containers for Change refund point or place eligible items in your household recycling bin.

Not only does this help reduce landfill waste, but it also rewards you with extra cash, making it a win-win for both the environment and your wallet.

Minimise food waste with **SAVEFUL**

This free app helps reduce mealtime stress and food waste by providing tailor-made recipes to use up what's in your pantry and suit your specific taste, cooking skills and budget.

Download the Saveful app today or visit saveful.com.au

Garden Organics

Green-lid green waste bins are collected **fortnightly** (on the alternate week to your recycle bin) on the same day as your refuse bin.

By recovering garden waste Council is reducing the amount of methane, a greenhouse gas, being produced; conserving space in the Kirknie Road Landfill and re-using a valuable resource.

Garden prunings & small branches
(under 10cm diameter)

Lawn clippings

Leaves

Flowers & twigs

NO:

- ✗ Large logs & branches (over 10cm diameter)
- ✗ Garden hoses, plastic pots & gardening tools
- ✗ Dirt, rocks, soil & building materials
- ✗ Treated timber & lattice
- ✗ Plastics, glass & metals
- ✗ Food scraps
- ✗ Nappies
- ✗ Plastic bags
- ✗ General waste
- ✗ Vapes

Batteries in bins can cause fires!

Don't bin it, B-cycle it!

Batteries are the most common form of hazardous household waste in Australia. Batteries in bins cause more than 10,000 fires each year in collection trucks and at waste facilities across the country.

When safely recycled through the B-cycle scheme, up to 95% of a battery's components can be turned into new batteries or used in other industries.

Where can I drop off my batteries?

You can drop off any of your loose household batteries for free in the Eco Batt collection vessels at Council's Waste Facilities or ask **Recycle Mate**.

For battery drop-off points near you, check: recyclemate.com.au
